

"In a first joint action: an informal coordination of groups and individuals for action and for animal and earth liberation, between 4 and 5 in the morning of Friday, November 7, 10 'Bonanno devices' (these are: false bombs, molotov's, incendiary devices... that in this case were 10 false bombs) were placed at the seats of capitalism and exploitation.

Those that received this warning were: Burger King's, McDonald's and K.F.C.. In addition to being a sabotage against the exploitation of flora and fauna, the second purpose of this action was to create 'nervousness and paranoia in the institutions of the repressive state', and to break the imposed social order, since those who defend capitalism also defend animal exploitation.

In this decentralized action the 'Bonanno devices' were distributed in different areas of the State of Mexico and Mexico City. The informal coordination of groups and individuals for action and for animal and earth liberation is an informal organization of cells and anonymous individuals that actively struggle to abolish exploitation and capitalism. The Frente de Liberacion Animal, part of this action, is already being seen as a threat, because in all the newspapers of Mexico the news was about an 'animal extremist group;' we know that stronger battles will come and we are ready to fight them. Those of us who shape this organization claim ourselves: young autonomous, subversive and rebellious, maintaining a permanent conflict against capitalism, exploitation and the state.

Not one step back ... against exploitation ... direct action and confrontation!

This action is claimed by:

The informal coordination of groups and individuals for action and for animal and earth liberation:

- Frente de liberacion animal [Animal Liberation Front]
- brigada de combate vegano barry horne [Brigade of Vegan Fighter Barry Horne]
- The Angry Vegan Brigade
- Milicias por los derechos de los animales [Milicias for Animal Rights]
- F.L.A. celula 5 [ALF cell 5]
- Comando verde negro [Green-Black Commando]
- Celula eco-anarquista por el ataque directo [Eco-Anarchist Cell for Direct Attack]
- Circulo autonomo de accion por la liberacion [Autonomous Circle of Action for Liberation]
- Brigada subversiva 11 de septiembre. [September 11 Subversive Brigade]

BARRY this action was for you!!!!"

ALF Mexico - History in the making

FLA, FLAM & FLA-CVN (Commando-Green Black)....the Frente de Liberacion Animal (FLA/ALF) is making it's mark in Mexico...

ALF Mexico

The first reported ALF actions in Mexico are; December 2006, when a KFC and fur store are sabotaged, and October 2007, when a pet shop was sabotaged by the F.L.A. Since then, December 2007 and January 2008 have seen a series of well planned and executed FLA actions in Mexico.

Similar to France, when two ALF reports in November 2002 caused a flurry of direct action three years later in 2005 - which is continuing to flourish, and also from April 2007 onwards, which saw Czech Republic heavily target hunting stands and other animal abuse after two actions in Sept/Nov 2006. Activists in Mexico have seen a spark and responded with a string of diverse actions.

This method also replicates the Band of Mercy (1974) which sparked direct action in England, by liberating animals and utilizing arson - two years later causing the birth of the Animal Liberation Front by Ronnie Lee.

The purpose of this post is to highlight the current growth of ALF activity in Mexico and is dedicated to the activists behind these compassionate actions.

Every year brings a new country or three to the frontlines of direct action for animals, whilst last year was the beginning for the Czech Republic, 2008 looks set for Mexico to win the "best newcomers" award.

Not that there really an award! But the front page of Bite Back Magazine would be a likely way to represent this.

The following are the actions that have been carried out...

THE SPARKS THAT CAUSED THE FLAME

December 10, 2006: FUR STORE, KFC HIT IN MONTERREY

anonymous communique:

"Greetings from México.

Two FLA (Frente de Liberación Animal) strikes very early this morning in Monterrey, Nuevo León.

The first target was a big fur store, where all locks and doors were glued, threw paint bombs and wrote "Frente de Liberación Animal", "Muerte" and "Cada Piel es una Muerte".

The second target was a KFC, that was painted with paint bombs.

In Support of all ALF and ELF cells and dedicated to the SHAC 7.
This fight for life won't end until the day we die.

March 6-11, 2008

24 Raids Against Animal Abusers in Last 3 Months; Here Are The Last Four

On March 6 the Animal Liberation Front (ALF) focused on attacking businesses that profit from the blood of animals. 3 restaurants in Mexico State where they sell dead animals, fried and roasted, were in the sights of the ALF. Not only were paints used but also their glass was sprayed with red paint and a grill was made unusable.

NO MATTER, SOONER OR LATER, THESE BUSINESSES WILL FALL BY THE HAND OF THE ALF!

March 7:

A very unpleasant surprise brought managers, employees and police to 'work' on the night of March 7. One of the many KFC located in Mexico State was spoiled by radical activists brought together in the Animal Liberation Front; what they found was economic sabotage like:

- x Walls with slogans like Murderers!
- x Floors, walls and doors stained with red paint.
- x Posters and announcements of KFC with spilled 'blood' paint.
- x Lighted signs and cables sabotaged, painted and made unusable.

The worst nightmare of bourgeois speciesists has reached them...

Go vegan sXe!

ALF

March 8

Once again the Animal Liberation Front (ALF) made use of direct action to remind the animal abusers that we are here and we remain standing in this struggle. In the early morning hours of this day, militants of the ALF in Mexico attacked two restaurants but this time not with spray paint because it is easily erased. This time we decided to attack its large windows with hydrofluoric acid; the acid is highly corrosive and permanent on glass. The slogans MURDERERS!, MEAT IS MURDER!, FLA were what these

bastards, who have no consideration for the lives of non-human animals, received.

Stop dreaming, direct action now!

Posted: For the speciesists with rancor, the ALF.

March 11:

Activists from the Animal Liberation Front once again made our presence known, reminding national and foreign speciesists that we exist and that vengeance for our animal brothers and sisters has come. Very early in the day we decided to attack one of the fast-food restaurants originating in the darkest interests of the American empire, KFC, which was hit with red paint resembling the blood of innocent animals and FLA appeared in permanent acid on their windows; this is not the end!

ALF Resurfaces in Guadalajara, Mexico August 2010

Animal Liberation Front Resurfaces in Guadalajara, Mexico

Received anonymously:

The Frente de Liberacion Animal claim two sabotages against animal exploiting businesses in Guadalajara, Mexico which we decided to carry out due to the disappearance of direct action in our city. The actions:

We spray-painted slogans in black on a poultry and egg transport trailer. The slogans painted were 'Eggs = Torture', 'Animals are not objects to use and consume, they were born to be free!' and 'ALF.' After painting, we fled into the night.

We (again) painted a 'Eukanuba' pet store. Their metal shutters which cover the windows were painted with slogans like 'No more using and profiting from animals', 'This company profits from the enslavement and torture of animals, do not buy from them' and 'ALF'

We want to clarify that these actions are simple and symbolic but we decided to not just talk but instead to attempt to make a change in the things they do to our brothers and sisters and the earth. We send abolitionist greetings to our comrade Diego Alonso who decided to evade the orders that the state issued in our own city by living how he wants to live.

Vegan Anarchist Prisoners Support Group Formed in Mexico: "Until the End"

December 8, 2012 - TURTLE RESCUED FROM PET STORE

anonymous report, from [Liberacion Total](#) (translation):

"On November 30, 2012 we liberated a turtle from a pet store in the Forum Mall in Mexico City. We did this as a small gesture, out of our conviction for total liberation, taking action against this system of cages and bars.

We want to dedicate this action to the anarchist warrior Mario Antonio Lopez, 'El Tripa', and also to the eco-anarchist warrior Braulio Duran, locked up in the Reclusorio Sur prison in Mexico City and in the CERESO in Leon, Guanajuato, respectively. We hope that within our ranks there is the ability to not only free the animals but also our imprisoned comrades.

Life should be able to develop in freedom and not be converted into a commodity. We oppose all forms of limitations imposed on us by this system which encourage submission and an artificial life maintaining the desire for money and power. We believe that like humans, animals are not merchandise and we fight to destroy all cages.

Soon this turtle will be in a natural area where he/she can experience freedom and all the risks that come with it.

We also want to show solidarity with our comrades who came out on December 1st to destroy everything, breaking, attacking and burning everything that smells of domination, on the day that Peoa Nieto took power. We know that the fight is against everything and not just against the president.

In solidarity with detainees and our moral support to the family of our comrade fallen in combat. There will be revenge when the heads of the police and powerful roll. Total War.

For human, animal and earth liberation
If not us, who? If not now, when?
Animal Liberation Front"

And we laughed at seeing the destroyed bank where we detonated an explosive charge of a little less than half a kilo of gunpowder, along with two cans of butane gas and a bottle of gasoline, all tied together tightly with heavy wire, inside the ATM area of Banco Santander in the deserted town of Tultitlan in Mexico State, yesterday, June 29.

The front structure of Banco Santander was completely destroyed, broken windows and the partially burnt place was our response, our laughter, our revenge, our weapon that we programmed and left inside the bank which we call: Direct Solidarity, openly, without intermediaries, without excuses.

The deafening sound of the explosion last night was your voice, the voices of those close to you, our voices and those of comrades still unknown to us throughout the world.

The inept police saw our action, the damages caused by our improvised explosive device; they were powerless as always, unable to foresee a strike against a bank that has now become a global target since Tortuga was badly wounded in the streets of Santiago; just as in Chile and Argentina, we have now attacked it in Mexico.

Santander has no way out, because as long as there are individuals who act in solidarity and arm themselves to take to the streets to illuminate them with fire or with the brilliance of broken glass, propaganda of the deed will prevail, the authorities will continue looking at each another without knowing what to do because even though we may fall prisoner or dead, they cannot stop the war that they started several centuries ago, since the beginning of civilization and agriculture.

Tortuga this was for you!
Direct solidarity with anti-society prisoners in Greece, with eco-anarchists in Switzerland, Mexico and the United States.

September 13, 2011 - TURTLES LIBERATED, KFC SET ON FIRE
anonymous report (translation):

"We claim the following actions in support of Luciano Pitronello:

-Liberation of two turtles that were held in captivity. They were released into a large lake where they can now live freely.

-We sprayed 4 liters of gasoline around a Kentucky Fried Chicken and set it on fire; as we fled, the flames violently spread and motorists turned, surprised by the action.

Animal Liberation Front
Mexico

- This prisoner support group supporting anti-civilization (animal and earth liberation) of Mexico was formed due to the urgent need to support our comrades who have fallen into the dungeons of the enemy.

- With the expansion that has taken place in the fight for animal and earth liberation Mexico, the state has implemented forms of repression against anarchists and eco cells, and against the anarchist movement in general in a battle to the death. During the last few years in Mexico, individuals have fallen into the dungeons of different individual Mexican states; it is now time, as Anarchists, to set aside fear and deal directly with the threat against freedom.

So far there are two prisoners in Mexico, eco-anarchists who are locked up; their sentences in prison promise to be "exemplary" for those who are breaking with the reality imposed on the rest of us. Their names are Abraham Lopez Magdaleno Martinez and Adrian Gonzales; this group seeks to aid them both in and out of prison, to avoid any pitfalls that those who fight victoriously for revolution might have to face someday.

- Critics of our struggle and the anarchist ideas have ensured that these two prisoners often lack concrete support; they need instead a break inside the prison, so we decided to form this group called "Until the End".

It is essential for the revolutionary struggle for a group to take a hand in the matter of prisoners, and more so if they have a different diet to that of other prisoners (vegetarian or vegan) and if you are claimed as prisoners at war.

The struggle for total liberation apparently is new to the ears of many, but these ideas have been building and developing for several years in Mexico; only since September of last year has there been more public presence of anarchists and eco-cells, including insurrectionary attacks with explosives that obviously have since become of concern to the authorities in each city where they have had the presence of direct action anarchists.

- Our comrades are Abraham and Adrian, imprisoned for trying to halt those immediately responsible for the expansion and the imminent destruction and domestication of the wild that is actually perpetrated by the current dominant regime, whose goal is the domestication and control of nature and the universe.

Anarchist comrades were not passive before such a spectacle, and in their correct beliefs tried to confront the mega machine; however they were captured, so now this group is how we can give them more solid support.

- Support fellow prisoners in any way you can and want, words of encouragement, poems, drawings, poetic terrorism, actions in your daily struggle, legal advice (lawyer), economically, etc.

- IMPORTANT NOTE: we as a support group do not belong to any direct action cell, we have nothing to do with them. We disclaim all illegal actions that take place in the future claiming to support Adrian and Abraham, we're just a group of individuals who attempt to be a practical support for prisoners and Anarchist comrades that may need our support in the future.

PS: For any Anarchist individuals, or groups that want to support and help shape this project, do not hesitate to contact us; we know that organizing a support group is not easy, so ask the support and solidarity with other prisoners and their supporters. With this group, Until the End, we hope to become a strong and concrete support for the hostages of the state. Contact: hastaelfinal@riseup.net

LATEST ATTACKS BY THE MEXICAN ANIMAL LIBERATION FRONT

January 7, 2011 - HOAX BOMB AT KFC

anonymous communique (translation):

"...I belong to the anarchist-revolutionary movement and I am proud of it. I represent a new tendency, Revolutionary Nihilism and Anarchist Antisocialism...
- words of the combatant Gerasimos Tsakalos

International solidarity is one of the most powerful weapons that we have as anarchist individuals and groups, each in their place, in their trenches. A few months ago that solidarity began to be expressed in Greece, Italy, Argentina and other countries where an International Front of conspiracy had been proposed against the state-capital.

In our view this is the beginning of a new stage in the world insurrectionist struggle. As mentioned before, the state has been implementing more and more violent methods against those of us who are a nuisance to their ability to carry out their dreams of domination and power, and it has therefore begun inquisitional hunts and has sequestered our comrades in their centers of domestication. Therefore we must also seek out and develop more violent methods against those who support the destruction of everything that has ever made us feel free.

We know very well that the authorities have doubled the police in the streets, have sentenced our comrades to spend long years in a cell, have put cameras in the streets, demonstrating the fear that they have of this more radical current of anarchy. An antisocial and insurrectionist current, which does not tempt the heart to attack as far as hearing bones broken, as far as seeing blood flowing from heads, seeing that they can not stand from weakness because the sticks and stones have struck their bodies, seeing the fire surrounding them from the molotov cocktails, and seeing their fingers fly off into pieces by a parcel bomb. That is the real current that the dominators fear, those who want at all costs to keep their luxuries and comforts that this industrial technological system gives them. They have already seen that our words are not futile, but rather become savage acts in the chaos which has spread everywhere, and that is

the world.

We will continue to attack despite the surveillance cameras they have put in the streets and avenues, despite their police-military rounds, despite their operations, despite their threats, anytime, anywhere and on any occasion and today we have made that clear. The war continues, and with comrades imprisoned or not, bombs will continue exploding, fire will continue illuminating the night, because chaos is not dead!

Direct solidarity with Adrian Magdaleno Gonzales, laugh at the prison authorities who think that they have broken you, while you continue onward!

Direct solidarity with Braulio Arturo Duran, continue fighting the cells that keep you captive, outside we will continue exploiting reality!

Direct solidarity with the prisoners in the Bomb Case in Chile, it will not last forever!

Direct solidarity with Walter Bond in the United States, the FBI has not made your wild conviction disappear!

Direct solidarity with Silvia, Costa and Billy in Switzerland and with Leo in Italy, continue forward with your eco-anarchist and anticivilization ideas!

Direct solidarity with Panagiotis Argyrou, Gerasimos Tsakalos and the others now on hunger strike, accused of being members of the Conspiracy Cells of Fire in Greece, antisocial, nihilist and anarchist forever!

July 6, 2011 - SANTANDER BANK BOMBED, FOR LUCIANO

translation of anonymous report from [Liberacion Total](#)

"On the first day of this month there was news that shocked our consciousness. A comrade a thousand kilometers from where we are had been wounded in action, his name: [Luciano Pitronello](#).

We know that he continues to be a warrior even in the conditions he is in, he who rejected the technology that all the sheep have brought to further deepen the pockets of the telecommunications industry, he who decided since he was an adolescent to remain in conflict against all authority, who carried out his life as seemed right to him and as he pleased, he who did not limit himself to just words and curses against the social peace and who took in his own hands the decision to make it explode at all costs.

With a fire extinguisher filled with gunpowder you once again wanted to destroy the existing order, but something went wrong and now you're held captive in a hospital with a future still uncertain. The press, the authorities and, even more, Chilean society make fun of your condition, but there is a saying: He who laughs last laughs best.

"...Who votes for them? Who bows their head in respect to them? Who admires them and wants himself, or at least his children, to be like them? Who keeps quiet in front of the gross injustices they commit? There is just one answer: SOCIETY...'Gerasimos Tsakalos.

On the night of February 5 we decided to attack some old enemies. A police headquarters located in the Potrero neighborhood in Coacalco, Mexico was the target.

At approximately 8pm, we placed an explosive device composed of butane gas canisters and gasoline in a motorcycle parked next to the entrance of the headquarters. By means of a homemade retarder, the explosive was lit and detonated; a loud noise shook the area, the bike was damaged as well as the wall of the building where the idiots who defend all of this were taking refuge. Several trucks arrived at the scene, the imbecile policemen dressed in their military uniforms arrived and saw the results of our explosive.

This attack was planned and designed especially for when they would be most vulnerable in their 'work' place. A police van with its sirens going right in front of us did not stop us.

They know it once again, they have not stopped us, they know that they will not stop these attacks; how easy it was for us to leave the bag with the explosive; it will be as easy to attack their physical integrity; it does not matter to us if they are parents or have family or any of that shit, they are police and all that they deserve are bombs, fire, stones and death. They think that we have not seen anything to extort? They believe that we have not seen them in their trailer, making note of their lack of courage, trying to intimidate with their big guns and their faces covered? They believe that we have not seen the rounds made by the bastards in the Grupo Especial de Reaccion Inmediata-Coacalco (GERI-C) [*Rapid Response Task Force*], in their armored trucks, clowning around believing themselves to be the heroes of that Mexican city? They believe that we have not seen their obvious megalomania in their black vans? They look more like an assault group, a paramilitary group, than some faithful servants under the command of state-capital. They should know one thing, the only thing they provoke isn't fear, it's disgust, it's repulsion for both their moral authority and their uniform.

If in submission and obedience society greets or fears them, that doesn't matter to us, if they are cheered or feared when they pass by that doesn't matter to us, we are not the vanguard defending the 'poor little exploited ones,' we are not the avengers of the 'oppressed pueblo,' all these leftist causes disgust us because all they do is make society reconsider its flaws and address them; we aren't fighting for an ecocidal human, we fight for ourselves as individuals, for the animals and for the earth, for autonomy and wild nature.

So we'll say it again, we will not stop ourselves from acting on the desire to attack them, because we are not part of this cowardly society, we will go to their police stations, their security posts and when they hear an explosion or see something engulfed in flames, they will remember us, any police officer anywhere in Mexico and

what scares them, what keeps them pensive as they sit on their leather sofas, it's what keeps them sleepless at night. It terrifies them that we have more and more capable individuals and that we have left our fear behind and have started (or rather we continue) to spread insurrection, expanding like the Black Death.

With this little speech we take responsibility for placing a fake bomb, which created a police mobilization, in a KFC during business hours in the city of Coacalco, in Mexico State on January 4. At the same time but a few blocks away, we set fire to a telephone booth and a truck along the side of a fire station.

How pathetic! Two fires in the vicinity of a fire station! That's how we demonstrate that we continue on, that we are in the streets, that they have not managed to stop us and that our destructive creativity can put the authorities in jeopardy once again even though they once thought themselves omnipresent and omnipotent.

We salute the individuals and groups that are currently carrying out a continuous social war in Italy, Greece, Spain, Chile, Argentina and other countries.

And especially the Russian ELF, which has begun to sabotage and set fire to machines that destroy the earth, hitting urbanization projects on the highways and in the forests of Moscow.

The international front in permanent conflict against the state-capital!

For the freedom of eco-prisoners Adrian and Braulio!

For the freedom of jailed members of the CCF, Gerasimos Tsakalos, Panagiotis Argyrou!

Direct solidarity with prisoners of war around the world!

War against civilization and the system of domination!

Frente de Liberacion de la Tierra/Mexico"

January 15, 2011 - ELF SET FIRE TO BULLDOZER, VEHICLES
anonymous communique (translation):

"... We are not in solidarity with the suffering of people, we are in solidarity with the energy and strength of those who do not tolerate their suffering ... words of the Conspiracy Cells of Fire

January 12:

Militants from the Frente de Liberacion de la Tierra wanted to show our full support for the prisoners of the Conspiracy Cells of Fire who will be prosecuted on the 17th of this month. So, armed with gasoline, we took to the streets to stoke the flames of

insurrection. We claim responsibility for the burning of:

A white van parked outside a luxury home

A cargo trailer

And a bulldozer inside a construction site

All these targets were in the town of Coacalco in Mexico State.

We are against civilization and its whole system of domination. The burning of cars is a clear challenge to the authorities who look after the interests of those who destroy ecosystems. Cars are now and will always be an important target, since the automobile industry is one of the biggest polluters, is making the land desolate and destroying the little remaining wildlife. More and more each day, the cities are filled with these machines; society (as always) is complicit with the planetary destruction, making the automobile industry more profitable due to the massive demand for them on every street; their unhappiness multiplying, disguised behind a smile on their face and their hands on the wheel. Life in society is false like everything in civilization. The newest cell phone? The latest car model? A luxurious beachfront house? The newest technology? All are lies, it is all an illusion fueled by the false hope of becoming 'someone' in life, a life governed by those who always tell you what to do and what not to do.

Because of all this, we say, war on society, war against the established order, war on modern civilization!

With this communique, in addition to this small critique of the systemized society, we also want to make public our participation in the International Network of Action and Solidarity. It will be based on the extensive effort of many individuals, cells and/or groups. We know that with time a network made up of people unknown to each other but with a common purpose will be one of the primary threats to the capital-state. We are already it, now that we are each acting on our own, imagining ourselves striking together, but in different parts of the world.

A fraternal greeting to the CCF of Greece, to the FAI in Italy, to the individual activists in Chile, to the ELF of Russia, to the autonomous individuals burning cars in Argentina and Germany, to the other comrades of Mexico and to any another person or persons who wish to participate in joint efforts of direct confrontation against all authority for years to come!

Freedom for comrades imprisoned in Mexico, Greece, Switzerland, Chile and throughout the world!
